

The Impact of Health Data Breaches

Percentage of respondents from a Ponemon Institute study that indicated a ransomware attack led to...

24%

an increased mortality rate

64%

delays in procedures and tests

59%

patient duration was longer than necessary

41.5M

individuals affected in H1 2023 per hhs.gov

325

covered entities have reported breaches to the Office for Civil Rights (OCR) in the first 6 months of 2023.

Representing an 86% increase from the same period in 2022 and a rise of 33% from the prior half-year

557

complaints filed against companies in federal courts over the last five years (nearly 2X the rate from 2022) per Bloomberg Law

\$10.1M

average cost of a healthcare data breach healthcare data breach reached a record high in 2022 per IBM

“You can’t protect what you can’t see.”

- David Ting, Founder & CTO, Tausight

Hacking accounts for a majority of the large breaches OCR has received per hhs.gov

69%

Increase in weekly average of U.S. cyberattacks in 2022 compared to 2021 per checkpoint.com

86%

A majority of patient data is unstructured per accenture.com

80%

Distributed care, virtual care and the need to share electronic protected health information (ePHI) are expanding healthcare’s attack surface. Our mission is to serve, help protect, and provide exceptional value to all healthcare providers and administrators who are entrusted with the care, safety, and privacy of their patients.

Tausight uses artificial intelligence (AI) to help organizations detect and respond to cyber threats. When a breach does happen to a Tausight customer, they are more resilient in recovery and better able to focus on patient care. Learn more at www.tausight.com.
